

Dr. Lisa Bloomer, Doctor of Naturopathic Medicine

14845 Yonge St. Unit 4 Hunter's Gate Plaza Aurora, ON L4G 6H8 **(905) 727-6500**

www.standrewschiro.ca info@standrewschiro.ca

Dear Parent,
This letter will confirm that your child has an appointment with Dr. Lisa Bloomer, Naturopathic Doctor on at
To best help you, I will need to know about your child's medical history. Please take a few moments to read this welcome package and fill in the questionnaires and the enclosed food diary. Please bring the completed questionnaires and food diary to your child's first appointment. These forms will be reviewed with you at your child's initial consultation, their concerns will be discussed, a complaint oriented physical examination will be performed if indicated and a treatment protocol is usually begun, depending on the complexity of your child's concerns and medical history. Initial Pediatric Naturopathic consultations are 1-1 ½ hours in length. Follow-up visits are 30 minutes in length.
If your address or daytime phone number changes before your initial appointment, please notify me of the change. If you have any questions, please do not hesitate to call my office at (905) 727-6500. Please allow 24 hours if it becomes necessary to cancel your child's appointment.
<u>Directions</u> : St. Andrew's Chiropractic & Wellness is located at 14845 Yonge Street, Unit 4 at the intersection of Yonge St. and Dunning Ave., in the Hunter's Gate Plaza.

Naturopathic Care Fee Schedule

Naturopathic Consultation Fee Schedule

\$240 \$105
\$205 \$105
\$205 \$105
\$90 \$165
\$65 (0-15 mins) \$105 (15-30 mins)

Diagnostic Testing Fee Schedule

Koenisburg Adrenal Function Test	\$ 28
Obermeyer Bowel Toxicity Test	\$ 50
Urine Dipstick	\$ 20

^{*}Bloodwork, hormone saliva, DUTCH tests as well as the IgG Food Sensitivity tests are available upon request or may be recommended. Prices vary for each individual test and will be discussed during your appointment.

I have read, fully	y understand, an	d agree to hono	ur the fee sche	dule listed above:

Date:	Patient's signature:	
Last modified: January 31st, 2024	(Parent's signature)	

^{*} Fees are payable by a personal cheque, VISA, Mastercard debit or cash at the end of each visit. Consultations are exempt of HST, however HST is applied to all other fees (e.g. supplements). NSF cheques are subject to a \$25 fee.

^{*}Any Prescribed supplements/botanicals/homeopathics and/or appliances are not included in the above fees.

^{*}Please note that these fees are not covered by OHIP, however they may be covered by your extended health care plan.

^{*}Please provide 24 hours notice if you need to cancel any appointments, otherwise you will be billed for the full consultation fee.

INTRODUCTION TO NATUROPATHIC MEDICINE

Naturopathic Medicine is an exciting way of looking at health and wellness that takes its roots in many ancient healing traditions. One of the main principles of Naturopathic philosophy is treating the whole person, mind, body and spirit. In this way, we see health as the normal state in the body, which is easily influenced by our environment, our everyday experiences, and our emotions. The Naturopathic practitioner seeks to discover the underlying causes of illness, and rather than merely suppressing the symptoms of the disease we support the body and promote healing with various remedies and lifestyle changes. Our fundamental philosophy is to trust that within each person, when obstacles are removed, there is an innate ability to heal ourselves.

It follows then that there is much emphasis on self-responsibility for health, prevention, and patient education. Naturopathic Doctors do their absolute best to listen carefully to what their patient has to say about their bodies and their state of mind and then, as treatment continues, help the patient to understand how and why certain diseases may have manifested within their bodies and how changing lifestyle, diet and using various remedies will help them to make positive changes with their health. Naturopathic health care is for those who want to take control of their lives and their health. It is for those who want to understand which actions and attitudes contribute to better health.

A Naturopathic Doctor Will Use Many Healing Modalities

Your Naturopathic doctor can draw from a wide range of therapies and will develop a program specially designed for you. The most common modalities, which may be used individually or in combination, are described below:

Clinical Nutrition

There is an intrinsic relationship between nutrition and wellness. Naturopathic practitioners deal with a wide range of problems relating to nutrition, including factors that interfere with the body's absorption and utilization of nutrients and the diagnosis and treatment of numerous conditions that result from inadequate or defective nutrition. Dietary modifications, nutritional supplementation and detoxification can dramatically improve one's health.

Botanical Medicine

Medicines derived from plants and other natural sources have been used for centuries in the treatment and prevention of disease and for maintaining a state of well being and are the subject of a growing number of clinical research studies. While the active ingredients of some plant medicines are extremely powerful, they are safe and highly effective when administered by a trained Naturopathic Doctor. Your naturopathic doctor may use more than one at a time, since in many cases the healing effects of these remedies in combination are greater than the sum of their individual actions.

Traditional Chinese Medicine and Acupuncture

Chinese pulse and tongue diagnosis, acupuncture and the use of Eastern botanical medicines comprise oriental Medicine, a system of health care that has been used effectively for thousands of years in Asia, but which has only been introduced to North America in the 20th century. Since its introduction Naturopathic practitioners have used needle acupuncture and Eastern botanicals as a traditional part of Naturopathic practice. Acupuncture has been tested clinically in the treatment of chronic pain and in the weaning from addictive substances such as nicotine, caffeine, and many drugs.

Homeopathic Medicine

Originally developed during the 18th century by the physician Hahnemann, homeopathic medicine uses very dilute botanical, mineral or other substances to treat specific ailments. If a homeopathic remedy is indicated, your Naturopathic Doctor will select the appropriate formulation from the thousands of homeopathic remedies available, based on your total symptom picture.

Lifestyle Counselling

The roots of Naturopathy lie in the Natural Hygiene movement, which was popular in North America in the 1800's. The corner stones of preventive health care are clean air, clean water, exercise, healthy foods and freedom from excess stress. Naturopathic Practitioners are committed to the education and guidance of their patients in making positive changes to various parts of their current lifestyle that may be inhibiting total health and wellness. Whatever your diagnosis, you can expect to receive some lifestyle counselling every time you visit a Naturopathic Doctor, since prevention is a great part of Naturopathic philosophy and fundamental to the maintenance of good health! Remember, "an ounce of prevention is worth a pound of cure!"

Who Can Be Helped with Naturopathic Medicine?

A Naturopathic doctor is a primary care physician and patients of every age and every stage of life have been helped with Naturopathic care. Many patients present with long standing, chronic conditions such as skin diseases, respiratory diseases, female disorders, or gastrointestinal diseases and find much relief with the treatment plans that are available to them. Many patients present with distressing acute illnesses, which can be quickly improved to help avoid pain, loss of sleep, loss of work, and anxiety. Many patients seek a naturopathic doctor for education and prevention; you do not have to be sick to feel better. A Naturopathic program is looking toward the future. You can begin to feel better now, and you can reduce the likelihood of suffering and illness later in life.

How are Naturopathic Doctors Trained?

Naturopathic Doctors must study at least 7 years to become eligible to practice in Ontario and follow the same University pre-medical education as is received by all doctors. The Naturopathic portion of the program comprises 4 years (over 4,500 hours) of dedicated training leading to a Doctor of Naturopathic Medicine diploma from an approved institution, with over 1,200 hours of supervised clinical experience at the colleges outpatient clinic. There are five institutions in the United States and one in Canada that offers approved naturopathic education. Graduates of the comprehensive 4-year training at the Canadian College of Naturopathic Medicine practice throughout Canada and the world.

What Can I Expect During A Visit to a Naturopathic Doctor?

On the first visit the Naturopathic doctor will take an in-depth history, do a complaint oriented physical examination, and may use information from laboratory tests to make an assessment and diagnosis. First visits usually last approximately 1 ½ hours. Together with your input a treatment plan is formulated. It is especially important that goals are set together so that the patient is comfortable with the Naturopathic Doctor's recommendations. Subsequent or follow up visits will follow the treatment plan and address new concerns that arise in the patient's life. Follow up visits usually last 20-30 minutes. If a course of acupuncture is recommended, a series of eight appointments over 4 weeks will likely be scheduled. These visits usually last for approximately 30-45 minutes.

Dr. Lisa Bloomer, Doctor of Naturopathic Medicine

Please find a consent form and a diet diary on the following pages.

NATUROPATHIC MEDICINE INFORMED CONSENT

Naturopathic medicine is, as the name implies, the treatment and prevention of diseases by natural means. Naturopaths assess the whole person, taking into consideration physical, mental, emotional, and spiritual aspects of the individual. Gentle, non-invasive techniques are generally used to stimulate the body's inherent healing capacity.

Several different approaches are used. Diet and nutritional supplements, botanical medicine, homeopathy, oriental medicine and acupuncture, hydrotherapy, physical medicine, and lifestyle counseling are the mainstays of naturopathic medicine.

Individual diets and nutritional supplements are recommended to address deficiencies, treat disease processes and to promote health. The benefits include increased energy, increased gastrointestinal function, improved immunity and general well being.

Botanical Medicine is the use of herbal teas, tinctures, capsules, and other forms of herbal preparations to assist in the recovery from injury and disease. These compounds are also used to boost the body's immune system and prevent disease.

Homeopathy is a form of medicine based on the law of similars - that is the use of tiny doses of the very thing that causes symptoms in healthy people. These minute doses of plant, animal or mineral origin are used to stimulate the body's ability to heal itself. Homeopathy is a powerful tool and effects healing on a physical and emotional level.

Oriental medicine includes acupuncture, as well as the use of botanical formulas and dietary changes to eliminate disease and balance body functions. Acupuncture refers to the insertion of sterilized needles through the skin into underlying tissues at specific points on the surface of the body. Sometimes moxa (a compressed herb in the form of a stick) is burned over an acupuncture point to help relieve symptoms. Botanical formulas may be given in the form of pills, tinctures, extracts or decoctions (strong teas) to be taken internally or used externally as a wash. Herbal formulas may include shell, mineral and animal materials as well as plants. Dietary advice is based on Traditional Chinese medical theory.

Physical medicine refers to the use of hands-on techniques such as soft tissue and spinal manipulation, as well as various types of electrical stimulation and therapeutic ultrasound for the purpose of treating musculoskeletal and neurological problems. Hydrotherapy refers to the use of hot and cold water applications to improve circulation and stimulate the immune system.

As Naturopathic Medicine is a holistic approach to health, *lifestyle* is considered relevant to most health problems. Your naturopath will help you to identify risk factors and make recommendations to help you optimize your physical, mental, and emotional environment.

Your naturopath will take a thorough case history, do a screening physical examination, which could include a breast exam on females, and request bloodwork and urine tests as needed. If your case requires, the physical may include more specific examinations such as gynecological, rectal, prostate, or genital exams or your naturopath may request you visit your medical doctor for such exams.

Even the gentlest therapies have their complications, especially in certain physiological conditions such as pregnancy and lactation, or in young children. Some therapies must be used with caution in certain diseases such as diabetes, heart, liver, or kidney disease. It is especially important therefore that you inform your practitioner immediately of any disease process that you are suffering from, or if you are pregnant, suspect you are pregnant or you are breast feeding.

PLEASE TURN OVER

There are some health risks to treatment by Naturopathic Medicine. These include, but are not limited to:
Aggravation of pre-existing symptoms;
Allergic reactions to supplements or herbs;
Pain, bruising or injury from venipuncture, intramuscular injections or acupuncture;
Fainting or puncturing of an organ with acupuncture needles, accidental burning of skin from the use of moxa;
I understand that a record will be kept of the health services provided to me. This record will be kept confidential and will not be released to others unless so directed by myself or my representative or unless it is required by law. I understand that I may look at my record at anytime and can request a copy of it by paying the appropriate fee. I understand that information from my record may be analyzed for research purposes, and that my identity will be protected and kept confidential. I understand that the naturopath will answer any questions I have to the best of her/his ability. I understand that results are not guaranteed. I do not expect the naturopath to be able to anticipate and explain all risks and complications. I will rely on her/him to exercise judgment during the procedure which she/he feels at the time is in my best interests, based upon the facts then known.
I have read the above information and with this knowledge, I voluntarily consent to the diagnostic and therapeutic procedures mentioned above, except for: (please list exceptions)
I intend this consent form to cover the entire course of treatment for my present condition. I understand that I am free to withdraw my consent and to discontinue participation in these procedures at any time.
Signature of Patient or Guardian Date:

PLEASE DON'T FORGET TO COMPLETE THE FOOD DIARY ON THE NEXT PAGE PRIOR TO YOUR CHILD'S APPOINTMENT.
